	Wheel rims and spokes ... ... ... 29

## INSTRUCTIONS FOR ORDERING SPARE PARTS

This Spare Parts List deals with replaceable parts for Models 88, 99, ES2 and 50 of 1959 manufacture.

It is most essential that the Engine and Frame Number of the machine is stated. The Engine Number is to be found on the transmission side of the Crankcase directly below cylinder base. The frame number is stamped on the nearside of the frame gusset plate on all models. It is always advisable to order parts on a separate sheet, and not to include on the same sheet other matter of a different nature; this facilitates prompt despatch.

It is found in a number of instances that money orders and postal orders are sent in parcels containing patterns ; this is inadvisable. We strongly recommend parts as patterns being despatched separately, and a covering letter sent containing the remittance for replacement parts.

## RETURNING MACHINES FOR OVERHAULING

When returning machines or parts for repair or overhaul, these should be sent carriage paid, and with the sender's name and address in full securely attached. It is also advisable to state on the tally that a letter has been sent respecting the parts, and giving the date. All easily detached fittings should be removed, such as Lamps, Horns, Tool Bags, Speedometers, etc. ; these are liable to be lost or damaged in transit, and the Company cannot accept any responsibility for them.

## ESTIMATES FOR REPAIRING MACHINES

We are always prepared to give approximate estimates for the cost of repairs ; it is quite impossible to give a firm quotation. Additional parts may be found necessary during the process of repair, unforeseen when preparing an estimate. Should our estimate for repair not be accepted, a charge may be made in accordance with work entailed in dismantling and re-assembling. When we give an estimate for cost of repairs, and this is curtailed by the owner, we cannot accept any responsibility for the performance of the machine ; it is always preferable to accept our estimate in full.

## PURCHASE OF SPARE PARTS

Norton Dealers throughout the British Isles generally carry a very comprehensive stock of Norton spare parts and it is recommended that owners should obtain any spare parts required through them.

The name of the nearest Norton dealer will be supplied on request and if any difficulty whatever is experienced in obtaining spare parts through a Norton Dealer, if we are advised, we shall be very pleased to investigate the matter.

It is our desire that replacement parts are available to Norton owners with the least possible delay.

Please note we reserve the right to alter the prices in the list at any time without notice.
